

INTEGRATION ARCHITECT (M/W/D)

WHAT CONVINCES US

- Significant experience in integration, solution or platform architecture within a complex organisation
- Strong knowledge of APIs, events, messaging, batch integration and hybrid integration patterns and of when to use which
- Experience with enterprise integration platforms and cloud-based integration services, ideally on Google Cloud
- Proven experience integrating SAP, enterprise applications, data platforms and external services
- Practical understanding of integration security, resilience, observability and lifecycle management
- The ability to guide engineering teams through complex design decisions and to influence without direct reporting authority
- Strong systems thinking, pragmatic judgement and clear communication with engineering, architecture and business stakeholders
- Business-fluent English; German is a plus

WHAT YOU WILL DRIVE WITH US

- Shape and evolve Müller's enterprise integration architecture, including the target state and the roadmap to get there
- Define clear integration principles for when to use synchronous, asynchronous, event-driven or batch approaches and establish reusable patterns for security, error handling, retries, monitoring and observability

LOCATION

**020276 Bucharest
Str. Barbu Văcărescu
301-311**

- Establish standards for API design, versioning, documentation, ownership and lifecycle management, while driving reuse through an integration and API catalogue
- Provide architectural direction for our new integration platform and review key integration designs across the organisation.
- Bring integration expertise into SAP S/4HANA, data platform and application initiatives from an early stage
- Drive the transition from point-to-point interfaces towards strategic integration patterns, ensuring clear ownership, service expectations and support models for every interface
- Collaborate closely with Process, SAP, Data and Technical Domain Architects as well as engineering teams to turn architectural principles into practical, implementable solutions

WHAT WE OFFER

- The opportunity to shape Müller's integration architecture from the ground up, as part of a large transformation including SAP S/4HANA and a new integration platform, for one of Europe's largest family-owned retailers.
- Modern technologies, challenging integration topics and an environment where technological excellence is explicitly encouraged.
- Flexible hybrid working policy with 26 vacation days
- Meal tickets and private health insurance
- Two locations – Bucharest or Ulm
- Modern IT organisation with 230+ colleagues, flat hierarchies and room to shape your domain
- Employee discount on products Müller sells
