

TECH LEAD MOBILE APP (M/W/D)

WHAT CONVINCES US

- Several years of hands-on mobile development with deep experience in cross-platform development, ideally React Native, including at least one consumer app with a large user base shipped and run on iOS and Android.
- Experience as a Tech Lead or Lead Engineer, setting technical direction for other engineers and mentoring them, including in distributed teams.
- Solid knowledge of mobile architecture: navigation, state management, offline behaviour, performance, deep linking and push notifications.
- Proven experience connecting mobile apps to backend APIs and to customer login and identity systems, and with mobile build, release and production monitoring.
- Substantial hands-on experience developing software with AI coding assistants and agents, with the judgement to know where they help and where they don't.
- Ideally, experience with retail, e-commerce or loyalty apps, apps across several countries and languages, or migrating an existing app while keeping its users.
- Pragmatic decision-making, clear communication, and a strong sense of ownership for product quality and the customer experience.
- Business-fluent English; German is a plus.

WHAT YOU WILL DRIVE WITH US

- Shape and evolve the architecture of our new customer app together with the team,

LOCATION

**020276 Bucharest

- driving key foundation decisions from tooling to build and release setup.
- Stay hands-on by building critical parts of the app yourself, reviewing code, and establishing engineering standards for quality, testing, accessibility, performance, and security.
 - Drive an AI-first way of working within the team by setting standards and guardrails for AI-assisted development and exploring new AI tools and approaches.
 - Ensure the app meets its quality targets and that releases are reliable, covering everything from CI/CD to staged rollouts.
 - Act as the app's technical counterpart for the backend, identity, commerce, and loyalty teams, ensuring requirements are clearly communicated and potential gaps are identified early.
 - Support and mentor engineers, share knowledge across teams, and contribute to the assessment of technical skills during recruiting as a senior expert without disciplinary responsibility.
 - In close collaboration with the Product Owner, identify opportunities where AI and technology can create additional value within the app itself.

WHAT WE OFFER

- Flexible, hybrid working policy with 26 vacation days
 - Meal tickets and private health insurance.
 - Two locations, one team — work from Bucharest or Ulm
 - A modern IT organisation with over 230 colleagues, flat hierarchies and real freedom to shape your domain.
 - Employee discount on Müller products
 - A greenfield opportunity to shape and build a new customer app from day one, used by millions of customers across Europe, for one of Europe's largest family-owned retailers.
 - A senior expert career path with real technical influence, in a team that works AI-first.
