

DATA ARCHITECT (M/W/D)

WHAT CONVINCES US

- Several years of experience as a Data Architect, Information Architect, Enterprise Data Architect, or in a comparable role with responsibility for data and data platform architectures in complex organizations.
- Proven experience in defining data domains, data products, data models, master data concepts, data ownership frameworks, and transformation roadmaps.
- Strong understanding of data governance, metadata management, data quality, data lineage, data privacy, data retention policies, and regulatory requirements.
- Experience integrating complex enterprise landscapes, including SAP systems, data platforms, and data integration solutions.
- Ability to evaluate architecture decisions holistically with regard to governance, scalability, reusability, data quality, security, and cost efficiency.
- Strong ability to facilitate complex data and architecture decisions, align diverse stakeholder interests, and communicate decisions clearly and persuasively across all levels of the organization.
- Business-fluent English and very good German or Romanian language skills.

WHAT YOU WILL DRIVE WITH US

- Define and continuously evolve the Enterprise Data Architecture, target state, and multi-year transformation roadmap.
- Own the definition and continuous evolution of the target architecture for

LOCATION

data domains, data products, data models, and master data.

- Establish architecture standards, design principles, and reusable solution patterns across the entire data landscape.
- Own the architecture of the new Data Platform and ensure its consistent integration with SAP and other enterprise systems.
- Ensure that operational processes, data products, reporting, analytics, and AI solutions are built on a consistent and future-proof data architecture.
- Establish enterprise-wide standards for data governance, data ownership, data quality, data lineage, metadata management, and lifecycle management.
- Embed data privacy, security, and regulatory requirements as an integral part of all architecture decisions.

WHAT WE OFFER

- Flexible, hybrid working policy with 26 vacation days
- Meal tickets and private health insurance.
- Two locations, one team — work from Bucharest or Ulm
- Modern technologies, challenging architectural topics and an environment where technological excellence is explicitly encouraged.
- A modern IT organisation with over 230 colleagues, flat hierarchies and real freedom to shape your domain.
- Shape the Enterprise Data Architecture and actively influence our Data, Analytics and AI landscape.
- Take on a key role within the architecture team with short decision-making processes and high visibility.
- Work with modern technologies on challenging topics and innovative solutions.
- Employee discount on Müller products
